Education

- **University of Wisconsin-Madison**

3rd-year Ph.D. student in Computer Science. Minor in Economics.

Madison, Wisconsin

Aug. 2021 — Jun. 2026 (expected)

- **National Chengchi University (NCCU)**

B.S. in Computer Science. (Major GPA: 3.96/4.30)

Taipei, Taiwan

Sep. 2016 — Jul. 2020

Research Summary

I am passionate about advancing potent and efficient techniques for **data-centric AI**, specifically empowering **foundation models** to acquire more knowledge while diminishing reliance on extensive human annotations. To achieve this objective, I have undertaken several initiatives:

1. Pioneered the first **parameter trading market** to enhance multi-agents' performance while reducing training costs [1].
2. Presented a new adaption method with label information to improve **foundation models** without extra training [2].
3. Proposed a scalable **multimodal data curation framework** via ensembles and object detection to improve CLIP [3].
4. Built a **zero-cost labeling system**, integrating with synthesized labeling sources via ICL, RAG, and Code LLMs [4].
5. Tailored LLaMA for low-resource domains and built the first **large language model** for traditional Chinese medicine.

Research Experience

- **Department of Computer Science, UW-Madison**

Graduate Research Student, advised by Prof. Frederic Sala

Madison, Wisconsin

Feb. 2022 — Present

- **Train 'n Trade: Foundations of Parameter Markets** [1] :
 - Designed a new knowledge exchange marketplace for multi-agents to trade parameter sets and to accelerate training process.
 - Applied parameter alignment to merge models and proved efficacy via faster convergence and successful monetization.
- **Geometry-Aware Adaptation for Pretrained Models** [2]:
 - Proposed a new adaption method by leveraging relational information in label spaces to improve foundation models (CLIP).
 - Validated enhanced foundation models over SimCLR on ImageNet and scaled to extreme classes without additional training.
- **Multimodal Data Curation via Object Detection and Filter Ensembles** [3]:
 - Built a scalable multimodal data curation framework via filter ensembles and object detection (e.g. DINO) to improve CLIP.
 - **Rank #1** on the small-scale filtering track of ICCV'23 Datacomp leaderboard.
- **ScriptoriumWS: A Code Generation Assistant for Weak Supervision** [4]:
 - Applied in-context learning, RAG and Code LLMs to develop zero-cost labeling systems with synthesized labeling sources.
 - Showcased framework efficacy by comparable label correctness but higher coverage on par with human annotation standards.
- **AutoWS-Bench-101: Benchmarking Automated Weak Supervision with 100 Labels** [5]:
 - Developed a new benchmarking framework to evaluate automated weak supervision techniques on diverse science tasks.

- **Awan.AI (Startup)** San Jose, California
May. 2023 — Present
CEO and Founder, collaborated with TechTCM
 - **Large Language Models for Traditional Chinese Medicine:**
 - Tailored generative AI solutions with LLaMA and LangChain and built the first LLM for traditional Chinese medicine.
 - Curated customized and synthesized datasets for LLM continue pretraining and fine-tuning with LoRA and Flash Attention.
 - **Vision-Language Model for Tongue Diagnosis in Traditional Chinese Medicine (in-progress):**
 - Research on ViT with crowdsourcing tongue images and medical diagnosis to answer extreme multi-label syndromes.
- **Argonne National Laboratory** Lemont, Illinois
Jun. 2019 — Sep. 2019
Research Intern, advised by Dr. Charles Catlett
 - **Radiative Error Reduction for Low-cost Temperature Sensors:**
 - Researched pattern identification on time series and ensemble learning to improve calibration model performance by **25%**.
- **Department of Computer Science, NCCU** Taipei, Taiwan
Sep. 2018 — Aug. 2021
Research Assistant at Data Mining Lab, advised by Prof. Man-Kwan Shan
 - **Key Sensor Discovery for Quality Audit of Air Sensor Networks [6]:**
 - Proposed a new quality audit framework to monitor low-cost sensor performance while reducing human effort on inspections.
 - Developed sensor correlation model and built diverse relational graphs to discover key sensors via graph traversal algorithms.
 - **Early Prediction of Affected Sensors by Local Events Detected over Social Media:**
 - Applied spatial-temporal GNNs to detect anomalies in multivariate time series and to label diffusion among regions.
 - Developed an early prediction framework with Seq2seq models for affected region prediction with F1-score of **80%**.
 - **Missing Value Estimation of Large Scale Air Monitoring Sensor Network:**
 - Developed spatial-temporal correlation models via geo-context for missing value imputation with error rate less than **10%**.
 - Enhanced correlation models with diverse time series segmentation methodologies by **17%**.
- **Institute of Information Science, Academia Sinica** Taipei, Taiwan
Feb. 2018 — Jul. 2020
Research Intern at Network Research Lab, advised by Dr. Ling-Jyh Chen
 - **Calibrating Low-cost PM2.5 Sensors in Large Scale IoT Environmental Monitoring Systems:**
 - Proposed an adaptive calibration framework with regression models to ensure data quality of large-scale low-cost air sensors.
 - Project was awarded Undergrad Student Research Scholarship granted by Ministry of Science and Technology in Taiwan.
 - **PiM25 — Environmental Sensing Hub:**
 - Designed maker-based sensor hub with OTA updates to detect environmental conditions, e.g., air, temperature, and sounds.
 - PiM25 was accepted by HKoscon'19 and COSCUP'19 to demonstrate and was the first TW's project reported by Magpi.

Awards

- **Conference Scholar Award:** granted by NeurIPS'23.
- **ICCV'23 Datacomp Competition:** rank #1 in the small-scale filtering track.
- **First-year Departmental Scholarship:** granted by Department of Computer Science, UW-Madison.
- **International Research Intern Scholarship:** granted by National Chengchi University (NCCU).
- **Undergrad Student Research Scholarship:** granted by Ministry of Science and Technology (MOST), Taiwan.

Invited Talks

- **IoT Instantiation: Air Sensor Deployment:** invited by Nangang High School (Taipei), Dec. 2019.
- **Internship Abroad Scholarship Sharing:** invited by National Chengchi University, Sep. 2019.
- **LASS Conference International Session:** invited by Institute of Information Science, Academia Sinica, Jul. 2019.
- **Techbang Magazine Sharing: PiM25 Project:** invited by Techbang Magazine, Mar. 2019.
- **Raspberry Pi Jam: PiM25 Project:** invited by Raspberry Pi Foundation (Taiwan), Mar. 2019.
- **The 24th of Raspberry Pi Meetup: PiM25 Project:** invited by Raspberry Pi Foundation (Taiwan), Jan. 2019.

Academic Services

- **Co-organizer:** AutoML Cup in AutoML'23.
- **Paper Reviewer:** GLOBECOM'20, NeurIPS'23, ICLR'24, CoLLAs'24, ICML'24, DMLR.
- **Student Association of Taiwan (SAT), UW-Madison:** President, Jun. 2022 — May. 2023.
- **Student Association of Taiwan (SAT), UW-Madison:** Vice President, Jun. 2021 — May. 2022.

Programming Skills

- **Programming Languages:** Python, R, C++, SQL, LaTeX, and Shell Programming.
- **Technologies:** PyTorch, Tensorflow, Keras, ShinyApp, PostgreSQL, Linux, Flask, Dash Visualization, Git, and Vim.
