## Education

- **University of Wisconsin-Madison** Madison, Wisconsin  
Third-year Ph.D. student, majoring in Computer Science and minoring in Economics. Aug. 2021 — Jun. 2026 (expected)
- **National Chengchi University (NCCU)** Taipei, Taiwan  
B.S. in Computer Science. (Major GPA: 3.96/4.30) Sep. 2016 — Jul. 2020

## Research Summary

I am passionate about advancing potent and efficient techniques for **data-centric AI**, specifically empowering **foundation models** to acquire more knowledge while diminishing reliance on extensive human annotations. To achieve this objective, I have undertaken several initiatives:

1. Pioneered the first *parameter trading market* to enhance multi-agents' performance while reducing training costs [1].
2. Proposed a scalable *multimodal data curation framework* via filter ensembles and object detection to improve CLIP [3].
3. Built a *zero-cost labeling system*, incorporating with synthesized label sources through ICL, RAG and Code LLMs [4].
4. Introduced a new benchmarking framework for *automated weak supervision techniques* on diverse domain tasks [5].
5. Tailored LLaMA with customized datasets to build the first *large language model* for traditional Chinese medicine.

## Research Experience

- **Department of Computer Science, UW-Madison** Madison, Wisconsin  
Graduate Research Student, advised by Prof. Frederic Sala Feb. 2022 — Present
  - **Train 'n Trade: Foundations of Parameter Markets [1]** :
    - Designed a new knowledge exchange marketplace for multi-agents to trade parameter sets and to accelerate training process.
    - Applied model alignment to merge parameters and proved efficacy with faster convergence and successful monetization.
  - **Geometry-Aware Adaptation for Pretrained Models [2]**:
    - Proposed a new adaption method by leveraging relational information in label spaces to improve pretrained models (CLIP).
    - Validated enhanced pretrained model over SimCLR on ImageNet and scaled to extreme classes without additional training.
  - **Multimodal Data Curation via Object Detection and Filter Ensembles [3]**:
    - Built a scalable multimodal data curation framework via filter ensembles and object detection (DINO) to improve CLIP.
    - **Rank #1** on the small-scale filtering track of ICCV'23 Datacomp leaderboard at the time of writing.
  - **ScriptoriumWS: A Code Generation Assistant for Weak Supervision [4]**:
    - Applied in-context learning, RAG and Code LLMs to develop zero-cost labeling systems with synthesized labeling sources.
  - **AutoWS-Bench-101: Benchmarking Automated Weak Supervision with 100 Labels [5]**:
    - Developed a new benchmark framework to evaluate automated weak supervision techniques on diverse domain science tasks.

- **Awan.AI (Startup)** San Jose, California  
May. 2023 — Present  
CEO and Founder, collaborated with TechTCM
  - **Large Language Models for Traditional Chinese Medicine:**
    - Tailored low-cost generative AI solutions with LLaMA and built the first language model for traditional Chinese medicine.
    - Curated customized and synthesized datasets for LLM continue pretraining and fine-tuning with LoRA and Flash Attention.
  - **Vision-Language Model for Tongue Diagnosis in Traditional Chinese Medicine (in-progress):**
    - Research on LLaVA with crowdsourcing tongue images and medical diagnosis to detect extreme multi-label syndromes.
- **Argonne National Laboratory** Lemont, Illinois  
Jun. 2019 — Sep. 2019  
Research Intern, advised by Dr. Charles Catlett
  - **Radiative Error Reduction for Low-cost Temperature Sensors:**
    - Researched pattern identification on time series and ensemble learning to improve calibration model performance by **25%**.
- **Department of Computer Science, NCCU** Taipei, Taiwan  
Sep. 2018 — Aug. 2021  
Research Assistant at Data Mining Lab, advised by Prof. Man-Kwan Shan
  - **Key Sensor Discovery for Quality Audit of Air Sensor Networks [6]:**
    - Proposed a novel quality audit framework to maintain low-cost sensor performance and reduce human effort of inspections.
    - Developed sensor correlation model and built diverse relational graphs to discover key sensors via graph traversal algorithms.
  - **Early Prediction of Affected Sensors by Local Events Detected over Social Media:**
    - Applied spatial-temporal GNNs to detect anomalies in multivariate time series and to label diffusion among regions.
    - Developed an early prediction framework with Seq2seq models for affected region prediction with F1-score of **80%**.
  - **Missing Value Estimation of Large Scale Air Monitoring Sensor Network:**
    - Developed spatial-temporal correlation models with geo-context for missing value imputation with error rate less than **10%**.
    - Enhanced correlation models with diverse time series segmentation methodologies by **17%**.
- **Institute of Information Science, Academia Sinica** Taipei, Taiwan  
Feb. 2018 — Jul. 2020  
Research Intern at Network Research Lab, advised by Dr. Ling-Jyh Chen
  - **Calibrating Low-cost PM2.5 Sensors in Large Scale IoT Environmental Monitoring Systems:**
    - Proposed an adaptive calibration framework with regression models to ensure data quality of large-scale low-cost air sensors.
    - Project was awarded Undergrad Student Research Scholarship granted by Ministry of Science and Technology in Taiwan.
  - **PiM25 — Environmental Sensing Hub:**
    - Designed a maker-based sensor hub with over-the-air updates to detect various environmental conditions.
    - PiM25 was accepted by HKoscon'19 and COSCUP'19 to demonstrate and was the **first** TW's project reported by Magpi.

## Awards

---

- **Conference Scholar Award:** granted by NeurIPS'23.
- **ICCV'23 Datacomp Competition:** rank #1 in the small-scale filtering track.
- **First-year Departmental Scholarship:** granted by Department of Computer Science, UW-Madison.
- **International Research Intern Scholarship:** granted by National Chengchi University (NCCU).
- **Undergrad Student Research Scholarship:** granted by Ministry of Science and Technology (MOST), Taiwan.

## Invited Talks

---

- **IoT Instantiation: Air Sensor Deployment:** invited by Nangang High School (Taipei), Dec. 2019.
- **Internship Abroad Scholarship Sharing:** invited by National Chengchi University, Sep. 2019.
- **LASS Conference International Session:** invited by Institute of Information Science, Academia Sinica, Jul. 2019.
- **Techbang Magazine Sharing: PiM25 Project:** invited by Techbang Magazine, Mar. 2019.
- **Raspberry Pi Jam: PiM25 Project:** invited by Raspberry Pi Foundation (Taiwan), Mar. 2019.
- **The 24th of Raspberry Pi Meetup: PiM25 Project:** invited by Raspberry Pi Foundation (Taiwan), Jan. 2019.

## Academic Services

---

- **Co-organizer:** AutoML Cup in AutoML'23.
- **Paper Reviewer:** GLOBECOM'20, NeurIPS'23, ICLR'24.
- **Student Association of Taiwan (SAT), UW-Madison:** President, Jun. 2022 — May. 2023.
- **Student Association of Taiwan (SAT), UW-Madison:** Vice President, Jun. 2021 — May. 2022.

## Programming Skills

---

- **Programming Languages:** Python, R, C++, SQL, LaTeX, and Shell Programming.
- **Technologies:** PyTorch, Tensorflow, Keras, ShinyApp, PostgreSQL, Linux, Flask, Dash Visualization, Git, and Vim.
